

### ### WhatsApp Carousel Cart

WhatsApp Carousel Cart - Receive orders from customers for your bussines.

Receiving orders via Whatsapp messages saves your time and your customers can skip a long waiting for call and explaining their orders.

Customers will open your app, choose product they want and delivery options and just tap on send button.

Order will be imediately sent to your Whatsapp number.

Tested on all major browsers and platforms, desktop and mobile.

### ### Requirements

Hosting and domain

Mobile phone with number and installed Whatsapp

### ### Credits:

Bootstrap 5

jQuery

Whatsapp

### ### Support

Additional info and support are fully available.

### ### Instructions:

Edit the files as you wish, upload them on your server and take care of the marketing stuff. You should inform your customers about a web address with your app and be prepared to take orders.

### ### HTML FILES

index.html - starting page

Edit your items like this:

```
<div class="col-lg-4 d-none d-lg-block">
  <div class="card">
    
    <div class="card-body">
      <h5 class="card-title">Cheeseburger</h5> //item's name//
      <p class="card-text">Order this delicious Cheeseburger.</p> //text about item//
      <p class="card-text">Price: ☐ 17</p> //item's price//
```

```
        <a href="#" data-name="Cheeseburger" data-price="17" class="add-to-cart btn btn-primary">Add to cart</a>
    </div>
</div>
</div>
```

### ### FOLDER JS

whatsapp\_order.js - Script for editing your phone number. Open with any text editor and edit.

```
const phone = '+385917331797' // Your Whatsapp Number, on which you want to send message.
```

### ### FOLDER CSS

style.css - Styles for the items.
